

Just because you're not at work

doesn't mean you're not at work

We Make Work, Work
XEROX[™]

Xerox is focused on enabling a more efficient workplace, productive employees, sustainable practices and a secure environment, wherever work is done.

Xerox hybrid worker offerings recreate the office experience with productive technology that is coupled with software, apps and services such as Managed Print to enable the worker to be productive.

SECURITY

Whether you choose to connect your workforce to in-house or cloud-based solutions, ConnectKey Technology uses the highest levels of security, ensuring your device and data are kept completely safe and secure.

Xerox's commitment to innovating for a better tomorrow has earned the company recognition as one of this year's Corporate Knights' Global 100 most sustainable corporations in the world. We are making inroads toward our goal of reaching net zero by 2040 through our innovative solutions and our best-in-class energy efficient products.

SUSTAINABILITY

CLOUD

92% of people in mid-sized organizations use multiple devices every day. To do their best work from anywhere, your people need safe access to the right files, folders, and information. **Xerox® Workplace Cloud** is easy to set up and use, so it's the ideal choice for businesses with limited access to IT. And because it's a cloud-based solution, it works across multiple networks, giving you complete control of every printer at every location.

Xerox has the largest breadth of solutions – from standalone print devices to affordable mobile and cloud enabled workplace assistants from a trusted company. State of the art refreshed and competitively priced product portfolio. Most printers are Wi-Fi enabled, ready to work right out of the box, delivering the reliability your customer needs to stay productive
